

PAN EVAPORATION SENSOR

SS-EVS is a highly accurate and highly sensitive evaporation sensor. It works on the principle of weighing to measure the evaporation by measuring the difference of liquid weight before and after measurement. The pan is made of high-quality stainless steel.

Features

- High accuracy
- Fast response
- Easy installation
- Simple operation
- Is not affected by chemical fertilizer and influence of metal ions

Technical Specifications

	SS-EVS
Range	0-75mm
Accuracy	±1%
Analog Output	4-20mA, 0-5V, 0-2V
Digital Output (Optional)	RS485
Response Time	<1s
PAN Size	Diameter: 200mm
Material	304 SS
IP Class	IP65
Operating voltage	12-24VDC
Weight	2.5 Kg
Cable	2m Standard
